

# Mapping the Milky Way structure with masers

Y. Xu<sup>1</sup> et al.

<sup>1</sup> Purple Mountain Observatory, Chinese Academy of Sciences, Nanjing 210008, China

Astrometric VLBI observations of maser sources in the Milky Way are used to map the Galactic spiral structure and to determine fundamental parameters such as the rotation velocity and curve. Here, we will talk about an update on the VLBI results and give an outlook to future observations.
